

Dear visitor, you may have noticed our URL changed from brightspace-support.tudelft.nl to **teaching-support.tudelft.nl**. Don't worry, we are the same Support team, we just embraced a new name! Read more about it at teaching-support.tudelft.nl/news (<https://teaching-support.tudelft.nl/news#2021-name-change-Teaching-support>).

Teaching & Learning Support (/) > Learning Tools Overview (/category/learning-tools-overview/) > Educational Tooling: Overview of tools used in education

Educational Tooling: Overview of tools used in education

The Advisory Committee Educational Tooling has created an overview of all the different tools that are currently being used in TU education. For each tool, which are not all centrally procured and supported, an advise on data responsibility is provided. The goal is to give advice on potential privacy (https://www.tudelft.nl/en/privacy-security/privacy/understanding-privacy) and security risks, how to mitigate these and/or what possible alternative tools can be used.

By continuing to use this website, you agree with the use of cookies. [More information](#)

Accept

The list below is an overview of the tools currently being used in education by the TU Delft lecturing population. In phases, these tools will be examined on privacy & security aspects in order to provide good advice on their use. So for now, please use the tools which are centrally procured and supported by the TU Delft. (<https://brightspace-support.tudelft.nl/tools-tu-delft/>)

In creating this overview a few criteria are used to assess the different tools. For an explanation on the impact and importance of these aspects, go to this separate page Education Tooling: Questions related to privacy and security (<https://brightspace-support.tudelft.nl/educational-tooling-questions/>).

For additions, feedback and suggestions, please email teaching-support@tudelft.nl (<mailto:teaching-support@tudelft.nl>)

 The rapid pace of changes in educational tooling and advice challenges our current capacity available. The website therefore may not always be as up-to-date as we would like. Thank you for your understanding.
